

**MERCED COUNTY
BOARD OF SUPERVISORS**

**Excerpts from the regular Board of Supervisors Meeting
Tuesday, May 6, 2003**

Item: UC Merced Liaison Report:

Kathleen M. Crookham, Chairperson/Supervisor-District Two/UC Board Liaison:

On May 14, 2003, the University, along with a couple of other groups, are having a zero-emission vehicle visit in Merced. It is going to be an opportunity for folks to see some of the fuel cell automobiles that we hope are going to be used in the future to help with the air quality.

For a couple of reasons, the County's name is going to be on some of the out-going information. One of the reasons the County name will be on the information is because the group will eventually meet at Lake Yosemite, which is County property, and also because a number of County officials are concerned about the air quality in the valley and are working on ways to resolve the issue.

Item Concluded.
