

# Environmental Resources

The natural resources of the Community Plan area are native plants and animals, topographic character, viewsheds, geology, soils, agriculture, air quality, surface water, and ground water. These resources represent essential factors for the physical, mental, and spiritual well-being of the populace, providing a sense of beauty and support to the economic base of the community at large. The policies aim to preserve, protect, and/or mitigate the loss of resources, promote the long-term sustainability and vitality of these resources within the larger regional context. These resources will be maintained within the Community Area for as long as possible and to the extent feasible. Surface and ground water policies are located in Utility Infrastructure: Water-Related Infrastructure.
